

STEEL ROOFING INNOVATIONS TO BE PRESENTED AT INTERBUILD

Steel roofing company, Safintra, will be giving a presentation on how steel roofs can be sustainable and help to create energy-efficient buildings at InterBuild, which is taking place on 23-24 August at the Nasrec Expo Centre in Johannesburg. The presentation, entitled Insights for Sustainable Steel Roofing, will focus on what sustainability means in terms of steel roofing and how new performance requirements are driving innovation around steel roofing.

Safintra is part of the Safal Group, which is the largest steel roofing company in Africa. Sally Stromnes, group marketing manager, will be giving the presentation.

"I will also focus on best practices for steel roofing systems, using smarter materials and better components, and systems that have warranted service life, delivering investment value for the owner and cost savings for the occupier," comments Stromnes.

"I WILL ALSO FOCUS ON BEST PRACTICES FOR STEEL ROOFING SYSTEMS, USING SMARTER MATERIALS AND BETTER COMPONENTS, AND SYSTEMS THAT HAVE WARRANTED SERVICE LIFE, DELIVERING INVESTMENT VALUE FOR THE OWNER AND COST SAVINGS FOR THE OCCUPIER," COMMENTS STROMNES.

NEW DEVELOPMENTS AND RENOWNED SYSTEMS

Safintra's internal product development team (known as the Innovation Africa team) recently launched a range of new components for a metal roofing system, one of which is a new-generation clip for the Saflok 700 concealed roofing system. This clip is engineered to withstand the increasingly violent weather we are experiencing, and has been designed to "lock down" the roof.

For energy-efficiency, Safintra has also launched photovoltaic panel attachment clamps that will make the roof

Sally Stromnes, group marketing manager of the Safintra Group, will be presenting at the InterBuild Expo.

a source of power without compromising the performance or warranty of the roof sheeting. In order to minimise maintenance costs, the company offers fasteners which have a life expectancy longer than that of the roof sheeting. One of the company's most renowned quality offerings is its roof system warranty, which warrants the integrated roof system for its thermal and functional performance and its durability. **WR**
