

SAFINTRA

THE NAME FOR WORLD CLASS METAL ROOFING SYSTEMS

Safintra roll-forms metal sheeting for the most innovative design demands and challenging structural requirements, offering a wide variety of profiles to suit the full spectrum of our client's needs.

STEEL ROOFING IS ENVIRONMENTALLY RESPONSIBLE

Steel roofing is the preferred choice for professionals on the cutting edge of green building innovations. It enables a wide range of solutions that make buildings more energy efficient, less costly to construct, less wasteful to occupy and therefore more sustainable.

Steel is 100% recyclable, and steel construction requires less material than most because of its high strength to weight ratio, thus saving resources.

BRANCHES:

Johannesburg, Cape Town, Durban, Port Elizabeth, Polokwane, Nelspruit, Bloemfontein. www.safintra.co.za
Further branches throughout SADC, Southern and Eastern Africa. www.safintra.com

SAFINTRA PRODUCTS

Safintra manufactures the trusted and proven **Saflok™** concealed fix profile in two variants: **Saflok 700** for wider sheet coverage, and the narrow **Saflok 410** format with extra lock-down for challenging wind load conditions. Mobile mills enable Saflok™ roof cladding to be rolled on site in continuous lengths of up to 120 metres.

Our exclusive pierced fix profiles include **Widedek™**, **Trimflute™** and **Fluteline™**, plus **Classicorr Corrugated** and **Tufdek IBR**. Safintra also manufactures the attractive **Versatile™** profile which combines the structural benefits of a continuous steel sheet with the aesthetic appeal of tile.

COMPLETE ROOFING SOLUTIONS

Safintra also fabricates and sells roofing accessories and related products. These include flashings (for ridges, wall and barge applications), **Cleardek** multi-wall polycarbonate sheet products and performance-tested **Fixtite** fasteners. **S-5!** clamps are suitable for almost any attachment of panels and other fixtures onto metal roofs.

TECHNICAL SERVICE AND SUPPORT

We offer full technical support services at all our roll forming operations. Working with our accredited roofing installers, we will offer warranties on installation (T & C apply).

DISCOVER A NEW KIND OF "SUSTAIN-ABILITY" AT 2015 ROADSHOW

Following its resoundingly successful "Metal Roofing Innovations" roadshow in 2013, Safintra is hosting a similar event in May 2015. This year, the theme is "Sustain-Ability: Be the Change" with the focus on materials, roofing systems and technologies that have dramatically improved the performance of metal roofing and cladding.

The roadshow will visit Johannesburg, Cape Town and Durban, with follow-up presentations held in Port Elizabeth, Bloemfontein, Nelspruit and Polokwane during June, July and August. All these events are CPD-accredited.

A highlight on this year's programme is international guest speaker, Rob Haddock, who will personally present at the larger 3 events. Globally, metal roofing is leading the charge for sustainable change and of the individual change agents and thought leaders, few are as prominent as Haddock.

INDUSTRY EXPERT: ROB HADDOCK

As the founder and director of the Metal Roof Advisory Group of the USA, Haddock is a well-recognised authority on metal roofing, a technical writer for many trade publications, a trade curriculum author, inventor and educator.

He annually speaks at the Metalcon International Trade Conference and Exhibition in the USA, and his presentations have been rated number one from a field of up to 52 offered seminars for 24 consecutive years.

He further teaches at the University of Wisconsin, Florida's Association of Roofing Professionals (FRSA), the National Roofing Contractors Association (NRCA), RCI Incorporated and others. Haddock's technical writings have been translated into five different languages and he has lectured in at least eight countries to producers, contractors, designers, specifiers and end-user groups.

For his contributions to the roofing industry, Haddock has received numerous awards, including:

- 2012: Inaugural inductee to the Metal Construction Hall of Fame.
- 2015: Larry Swaney Award for contributions towards the furtherance of the metal construction industry of North America.

SOLAR INTEGRATOR WORKSHOPS

Running concurrently with the roadshow, solar integrators and photovoltaic (PV) panel installers will have the opportunity to attend solar integrator workshops. Having invented the S-5 range of patented clamps, Haddock will discuss solar panel installation using these clamps and components.

S-5 CLAMPS OFFER SIGNIFICANT COST AND LEAD TIME SAVINGS

S-5 clamps offer significant cost and lead time savings over most other mounting systems. They are warranted for the full service of the roof and the panels, and offer structural performance that is well in excess of engineering requirements for weather and structural stresses. Safintra distributes the S-5 range of patented clamps throughout Africa on an exclusive basis.

The workshop will explore installation detailing and technical aspects of roof-mounted solar installations and the positive impact of fast installation on site.

This subject is highly topical in South Africa as Eskom moves to increase off-grid capacity and to encourage private participation in energy co-generation.

Safintra is a pan-African metal roofing manufacturer and is part of the largest metal roofing company in Africa, called the Safal Group. It is a market leader in offering metal roofing systems and solutions which have made metal roofing a preferred choice for building owners and professionals in a green-focussed industry.

Safintra roof profiles on display at the Innovations Roadshow in Johannesburg in November 2013.

Delegates at the Safintra Innovations Roadshow in Cape Town during October 2013 were captivated by the speakers.

ROADSHOW DATES:

Johannesburg: Thursday, 14 May 2015, and Friday, 15 May 2015.

Cape Town: Monday, 11 May 2015 • Durban: Wednesday, 13 May 2015

Follow-on presentations:

Port Elizabeth: Thursday, 2 July 2015 • Bloemfontein: Tuesday, 4 August 2015

Nelspruit: Thursday, 11 June 2015 • Polokwane: Thursday, 4 June 2015.

All events are CPD-accredited.

The Safintra Innovations Roadshow in 2013 also provided valuable networking opportunities.
