

Innovative

**BUILDING  
SYSTEMS**

# ABOUT SAFBUILD

SAFBUILD is made using a high-tensile galvanized steel structure to ensure durability and maximum strength.

- G-450 high tensile galvanized steel portal frames
- Galvanized cold-formed C and Z sections
- Suited for fast-build, simple, orthogonal shapes
- Design and engineering optimised for customer requirements

## BENEFITS

Fast and easy construction (building is also easy to relocate)

Durability

Design flexibility

Assured process (factory process, quality controlled, customised supply and minimised waste)

Lightweight construction

Environmentally friendly  
(100% recyclable steel – green building)

Introducing

# SAFBUILD PRE-ENGINEERED BUILDINGS

Safintra is proud to introduce a new development from within the Safal Group - SAFBUILD, a world-class Pre-Engineered Steel Building System.

These pre-engineered steel buildings are delivered as a complete solution. Ease of on-site assembly reduces overall costs of construction and project duration, from procurement to construction.

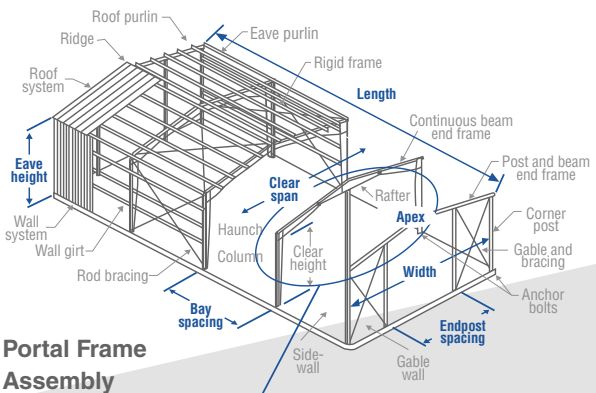

## CUSTOMISED READY-MADE BUILDINGS

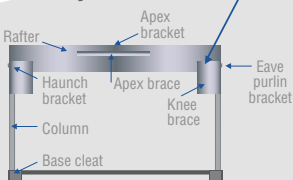

### Ideal for:

- Industries
- Warehouses
- Sheds (animal, utility and multi-purpose)
- Workshops
- Hangars
- Market sheds or stalls
- Schools or classrooms

## STRUCTURAL ELEMENTS

### Portal Frame Assembly

### Portal Frame Elements

## THE SAFBUILD PROCESS

Design and Quotation – Order – Process –  
Consolidation and Final Dues – Supply – Erection  
with Supervision – Certification

- Substructure preparation
- Approval of drawings
- Supply of materials to site
- Erection of fabricated portals
- Installation of purlins and braces
- Installation of wall girts and braces
- Roofing/wall cladding plus all ordered accessories – vents/skylights, doors, windows and other finishes

*Supply of material at site*

*Erection of fabricated portals*

*Installation of purlins and braces*

*Installation of wall girts and braces*

*Build your next project  
with speed and peace of mind.*

*Talk to us about the  
**SAFBUILD** advantage.*
