

**SAFSOLAR –
A DIVISION OF
SAFAL BUILDING
SOLUTIONS**

Introducing **SAFSOLAR**

As part of the Safal Group's ongoing solutions driven development, the advent of SAFSOLAR provides a unique opportunity to partner the functionality of Safintra's building solutions offering with a solar component to make buildings work harder and smarter for longer.

THE ENERGY CRISIS

South Africa's energy crisis has been ongoing for over a decade and this together with global pressure to reduce emissions is resulting in increased demand for renewable, non-polluting energy sources. South Africans have been quick to turn to solar power as an energy alternative.

Solar electricity generation represents a clean alternative to electricity from fossil fuels offering these advantages:

- **No air and water pollution**
- **No global warming pollution**
- **No risks of electricity price spikes**
- **No threats to public health**

The sun radiates more energy each day than the world uses in one year.

WHY CHOOSE SAFSOLAR?

The combined expertise and knowledge of Safintra and SAFSOLAR and the synergy between our products offers:

World-class concealed fix systems and metal coating technologies

Highest quality installations

Tested compatibility between PV module materials and AZ coated steel

Customised PV power solutions

Product and installation warranties

Guaranteed, forecasted PV output

Grid tied and off grid solutions

Operation, maintenance and service packages

Customised finance network options
